Experience

[AREA15](#) | Las Vegas / Hybrid — *Senior Developer* | FEBRUARY 2023 - PRESENT

I have been at the forefront of managing, enhancing, and constructing diverse projects for area15.com and other entertainment and sales-focused applications. My contributions include:

- ➔ Designed and implemented on-site ticketing/advertising kiosks for 15% increased ticket sales and enhanced user experience.
- ➔ Developed immersive games using JavaScript/Next.js, emphasizing interactive and captivating digital experiences.
- ➔ Crafted custom WordPress plugins with expertise in PHP and React.js, improving platform functionality and user interface.
- ➔ Proficiently integrated custom APIs, Stripe/Square API, HubSpot API, Strapi, and more for streamlined processes and enhanced performance.

[Strategy9](#) | Remote — *Software Developer* | AUGUST 2021 - OCTOBER 2024

I have been instrumental in spearheading the development of innovative features and enhancements tailored for the casino industry, fostering improved customer outreach and data collection. Key contributions include:

- ➔ Reduced valet management time by 40% with the creation of an SMS-based valet system, integrating advanced queue management.
- ➔ Conceptualized and implemented engaging contests, coupons, and promotions via email and SMS, boosting customer engagement and loyalty.
- ➔ Headed end-to-end email processes, ensuring compliance standards, effective communication, and brand consistency for over 800,000+ monthly emails.
- ➔ Developed sportspool applications for user data collection and data-driven marketing, showcasing a strategic and innovative approach.

[J Taylor Education](#) | Remote — *Lead Software Developer* | JUNE 2019 - OCTOBER 2024

As Senior/Lead Developer at J Taylor Education, I oversee all technology, optimizing infrastructure for efficient virtual education. Key accomplishments include:

- ➔ Spearheaded AWS robust online presence and improved user experience with 99.9% uptime.
- ➔ Delivered solutions using MERN stack, resulting in 25% improvement in platform speed and scalability.
- ➔ Designed user-centric virtual education solutions, ensuring a seamless learning experience for teachers and students.
- ➔ Increased site traffic with free chrome extension totaling over 50,000 downloads currently.
